PROFILE

Data Analyst with 4 years of experience delivering **product analytics**, **workflow automation**, and data-driven insights using **SQL**, **Python**, **Tableau**, and **Databricks**. Experienced in analyzing large-scale user and operational datasets, building **KPI dashboards**, and collaborating cross-functionally with business and technical teams to drive product and operational improvements. Skilled in **AI-assisted analytics**, **automation**, and transforming complex data into actionable insights

WORK EXPERIENCE

eToro Oct 2023 - Oct 2025
Data Analyst

- Built Tableau dashboards on Databricks using SQL for large-scale datasets, enabling KPI tracking and operational insights.
- Developed an AI-powered Q&A analytics tool on Azure Databricks for instant metric retrieval and faster reporting.
- Created automated monitoring alerts using Python and Google Chat API to identify operational anomalies in real time.
- Automated reporting workflows using Python and AI-assisted tools, saving hours of manual work daily.
- Analyzed customer activity and behavioral datasets to surface trends, KPIs, and actionable insights.
- Collaborated cross-functionally with 4 departments to deliver scalable analytics solutions.

eToro Feb 2022 - Oct 2023
Trading System Operator/Analyst

- Monitored large-scale trading systems and ensured operational continuity in fast-paced environments.
- Automated reporting and monitoring workflows using Python and data-driven alerting systems.
- Analyzed operational and market trends to support risk management and decision-making.

El Al Airlines 2018 - 2022
Air Marshal

- Operated in high-stakes, confidential environments requiring high professionalism, percision and rapid judgment under pressure.

EDUCATION

B.A. Economics & Management 2020 - 2023
Information Systems Major | Ruppin Academic Center

- GPA: 87.5
- Honors: IMPACT! Scholarship
- Final Project: Python Bitcoin price predictor using Twitter data - 68% accuracy
